

M.E.S.P. Constitution

In order to specifically state the protocols for this server, this constitution has been made to list the universal rules and systems (despite current type of politics). These rules cannot be broken, and they cannot be changed without the unanimous decision to do so by all officials of the M.E.S.P.

The M.E.S.P. is made to have a friendly community that also experiments with several types of political systems. It is not a roleplay, factions server, etc. It is unique.

Article 1

While citizens may choose leaders of the community, the universal staff that control the server shall be the oligarchs. These oligarchs will have been selected by the owner to keep the server itself from harm.

They shall only step in and take power over the community in emergencies or situations with the consent of the owner.

They shall be nominated for the position by the citizens and elected by the owner.

They shall generally deal with administering justice (hackers, spammers, etc.), safety (bullying, harassment, etc.), etc.

They shall be treated as a normal citizen in the society itself.

Article 2

The societal ideologies shall change upon the decision to do so by 80% of the players.

The politics shall be chosen by the owner with advice from the oligarchs and *requested* advice from the players.

Article 3

The decisions concerning law, construction, etc. shall be made solely by the citizens.

Citizens may decide upon their own majority and requirements for voters.

Article 4

The owner is to write a newsletter on the server's website every once in awhile to update everyone on recent events and status of the community. He must also thoroughly describe the politics of the community every time the ideologies are changed.

Article 5

Every citizen on the server is to be equal. This community will not deal with racism, sexism, etc. on its own.

If someone is not treated equally, it should be reported to an oligarch.

The punishment for excessive attempts to oppress/conquer others is a ban for one month.

Article 6

The land is not to be altered unless the community chooses to do so.

Griefing is unacceptable. Anyone found doing it shall be punished by the oligarchs.

The land is meant to be preserved, as environmental awareness remains important on the server.

Finality

More articles are likely to be added. In order for another to appear, there must be a unanimous decision to do so between the owner and all oligarchs.

An article may be removed or added with 80% of the citizens' agreement.

With these articles, the Minecraft Experimental Society Project may now begin. It shall be a fun, educational, enjoyable experience that should not suffer from any weaknesses in this document.

-Stewart (Owner)
